# **RESEARCH WORKSHOPS 2022-23**

Names of Faculty:

Dr. Vaidehi Lavand

Ar. Ramiya Gopalakrishnan

S.M.E.F.'S Brick School of

ArchitecturE

# Design of exercises to meet the teaching objectives:

The lecture inputs were designed for the students to comprehend the importance of research as an integral part of the architectural design process. The assignment explorations were planned to align with the course objective of introducing the students to various terminologies/ methods in Architectural Research and to enable them to prepare a research proposal.

# **Faculty Interpretation of the assignments:**

Topic of Exploration	Submission Requirement	Date
Literature Review	A4 sheet	01/03/2023
Exploring Mendeley	A4 sheet	08/03/2023
Technical Writing	A4 sheet	05/04/2023
Research Methodology Chart	A4 sheet	11/01/2023
Research Title Finalization	A4 sheet	29/03/2023

### **Technical Writing for Architectural Research:**

This session focused on the essentials of technical writing in the context of architectural research. Students learned how to structure their research papers, articulate their findings clearly, and present their arguments effectively. Emphasis was placed on clarity, precision, and adherence to academic standards, ensuring that architectural research communicates its insights in a professional and comprehensible manner.

## **Finalizing Research Topic:**

In this session, students explored strategies for refining their research topics. The lecture covered how to narrow down broad ideas into specific, researchable questions. Key considerations included relevance, feasibility, and the potential impact on the field of

architecture. Students were guided through a process of aligning their interests with gaps in existing research to finalize a compelling and manageable research topic.

#### **Exploring Mendeley as a Tool for Literature Review in Research:**

This session introduced Mendeley, a reference management tool, as a resource for conducting literature reviews. Students learned how to use Mendeley to organize research papers, annotate documents, and generate citations. The focus was on leveraging Mendeley's features to streamline the literature review process, enhance organization, and ensure accurate referencing.

#### How to do Literature Review for Architectural Research:

The session provided a comprehensive overview of the literature review process. Students were taught how to identify relevant sources, evaluate the quality of research, and synthesize findings from various studies. The lecture emphasized the importance of critically engaging with existing literature to build a solid foundation for their own research.

### **Research Methodology:**

This session covered the fundamental approaches to architectural research methodology. Students explored various research methods, including qualitative and quantitative techniques, case studies, and experimental designs. The focus was on selecting appropriate methodologies to address specific research questions and ensuring that the chosen methods align with the objectives of their architectural research.

Together, these sessions equipped students with the skills to effectively conduct and present architectural research, from selecting and refining their topics to utilizing tools and methodologies for a thorough investigation.
