Annual E-governance Report

S.M.E.F.'s Brick School of Architecture has implemented e-governance to efficiently manage human resources and share information with transparency, ensuring participation and accountability from all stakeholders. The institute's Enterprise Resource Planning (ERP) system uses Edumarshal software for academic administration, examinations and leave records. We have been using following systems for the whole cycle. The documents below show the sample reports of use of these systems.

S.No.	Name of the facility	Area of operation
1	CCTV Surveillance	At S.M.E.F.'s Brick School of Architecture, CCTV surveillance system (HIK Vision security brand) is strategically implemented to enhance security and ensure a safe learning environment. Cameras are placed in key areas such as entrances, and common spaces to monitor activities and deter misconduct. The system aids in maintaining discipline and provides a reliable record of events, which can be reviewed in case of any incidents. CCTV also supports the school's efforts in safeguarding students, staff, and property, fostering a secure atmosphere conducive to academic and creative pursuits. Privacy measures are respected, ensuring that surveillance is conducted responsibly.

Installation of CCTV cameras in the campus

2	Edumarshal ERP	S.M.E.F.'s Brick School of Architecture utilizes the Edumarshal ERP system to streamline administrative processes and enhance overall efficiency. This comprehensive platform manages key functions such as student enrollment, attendance, leave record and examination management. By automating these processes, Edumarshal reduces manual workload and minimizes errors, allowing for seamless communication between faculty, students, and administration. The ERP also provides real-time access to important data, enabling informed decision-making and improving transparency. With its user-friendly interface, Edumarshal ensures that all stakeholders can efficiently engage with institutional operations, supporting the school's commitment to academic excellence and organizational efficiency.
3	SMS messenger system	Edumarshal ERP system is integrated with an SMS messenger service to promptly inform parents about student absenteeism. When a student is marked absent, the system automatically sends a text message to the registered contact number of the parents or guardians. This real-time notification ensures that parents are immediately aware of their child's attendance status, enabling them to take timely action if necessary. The integration enhances communication between the institution and parents, fostering a proactive approach to student attendance and encouraging greater parental involvement in their child's academic journey.
3	Biometric attendance 	The institute employs a biometric attendance system to accurately and efficiently track attendance for staff. This system uses fingerprint recognition to record attendance, ensuring reliability and preventing fraudulent entries. The biometric system streamlines the attendance process, reducing time spent on manual record-keeping and minimizing errors. It also allows for real-time monitoring and easy generation of attendance reports, aiding in timely decision-making and improving overall administrative efficiency. By integrating biometric technology, the institute enhances accountability and ensures a secure and accurate attendance management system.

4	Tally	Tally is utilized for efficient and accurate financial management. This software plays a crucial role in handling various accounting tasks, including budgeting, payroll processing, expense tracking, and financial reporting. Tally simplifies complex financial processes by automating entries and calculations, reducing the likelihood of errors. It also provides real-time access to financial data, enabling timely decision-making and enhancing transparency in financial operations. The use of Tally ensures that the institution's financial records are well-organized, compliant with regulations, and easily accessible for audits and reviews, supporting sound financial governance.
5	Gmail	The institute uses the brick.edu.in Gmail platform for official communications, ensuring secure and professional correspondence. This dedicated email domain facilitates seamless communication between faculty, students, and administrative staff, maintaining a formal and consistent approach. The platform offers robust features such as cloud storage, shared calendars, and collaborative tools, enhancing productivity and coordination across various departments. By utilizing a custom email domain, the institute reinforces its brand identity and ensures that all communications are securely managed, archived, and easily accessible for reference, contributing to efficient and organized operations.
